OXYGEN ACETYLENE WELDING REELS from ALEMITE

From design to production, Alemite's new line of Welding Reels are engineered to perform better, last longer and be safer to maintain and operate. Based on our very successful 7330 Series of reels and designed for welding applications, these reels are easily mounted to a wall, ceiling, truck bed, floor or workbench. Alemite's Welding Reels are ideal for eliminating the hazards of loose hose and make the difference anywhere oxygen-acetylene is used for welding or cutting.

WELDING REEL ORDERING INFORMATION

MODEL	REEL	HOSE	SWIVEL	HOSE STOP
8071-A	7338-B	339539-30	339525	339538
8071-B	7338-B	339539-50	339525	339538
8071-D (Severe Duty)	7338-C	339539-50	339525	339538

OXYGEN ACETYLENE WELDING REELS FEATURES:

- Anti-lockout Ratchet—Prevents lock-up when the hose is fully extended, eliminating the need to manually release the pawl at the reel.
- Factory-lubricated One-piece Cassette—makes servicing safer and easier.
- Gasket Seals—Featured in severe duty reels to keep water and contaminants out, prevent corrosion and make the reel ideal for outside use.
- Ball Bearings and Arbor—Provide smooth retraction and durability.
