HIGH CAPACITY DOUBLE POST REELS from ALEMITE

The most RIGOROUS DOUBLE POST REELS on the market are now available from Alemite. These new reels will withstand the most severe conditions while providing high capacity flows. They will easily handle up to 100 feet of 1/2" diameter or up to 50 feet of 1" diameter hose. Corrosion resistant, easy to install and incredibly durable, Alemite's newest reels make the difference in high volume performance.

HIGH CAPACITY DOUBLE POST REEL FEATURES:

- Sealed Spring Cassette—Will not allow dirt and water to corrode the power spring.
- Outlet Port Swivel Nut—Makes the installation of the material hose easier.
- Narrow Width—Allows for more reels to be mounted along a truck bed.
- Double Arm—Provides support for the large hose during use.
- Mounting Footprint—Four corner bolt hole pattern on the outside of the base for stability and easy installation.
- Sealed and Plated Bearings—Keep corrosion and contamination from binding the shaft.
- Adjustable Arm—Allows mounting to the floor, ceiling or wall.
- Sealed Rollers—Eliminate contamination that can bind the hose guide rollers.
- Lifetime Warranty Hose Guide Assembly

COMMON INDUSTRY APPLICATIONS:

- High Volume Oil, Grease, or ATF Dispensing
- Evacuation of Used Oil
- Gasoline and Diesel Fuel Dispensing or Transfer
- Water and Anti-freeze/Coolant Dispensing or Transfer
